Good Indian
It's the best**

★ HORIZONTAL ENGINE WORKS IN PERFECT BALANCE—OPPOSITE THE CHAIN TO REDUCE VIBRATION—YOU CAN FEEL THE DIFFERENCE.

★ THE HIGH TENSION MAGNETO ASSURES EASY STARTING EVEN IN MID-WINTER.

★ AUTOMATICALLY PROTECTED TO OIL.

RUGGED POWER

Indian was the pioneer of the UNIT-BILT construction. The *Indian* frame, fuel tank and oil tank are cast from magnesium—in one piece. The new *Indian* horizontal saws are engineering improvements on the *Thunderbolt*—first saw to feature the principle of UNIT-BILT construction. Now we've used the idea of UNIT-BILT construction and added the engineering advantage of the horizontal engine mount.

NEAR PERFECT BALANCE

Yes—you can really feel and test the difference in an *Indian* THUNDERBOLT MARK II. Less vibration—near perfect balance mean less wear on all moving parts—and less wear on the user too.

TOP TRADE-IN VALUE

Indian users tell us they get top trade-ins. *Indian* dealers tell us it's easy to re-sell a used *Indian* saw. *Indian's* reputation for rugged dependability is the answer. Many *Indians* have been in use over 10 years.

EASY TO USE

Indian's balance, with the lightest weight in its horsepower class, means less fatigue. You can use an *Indian* all day and not be all tired out.

NEWEST!

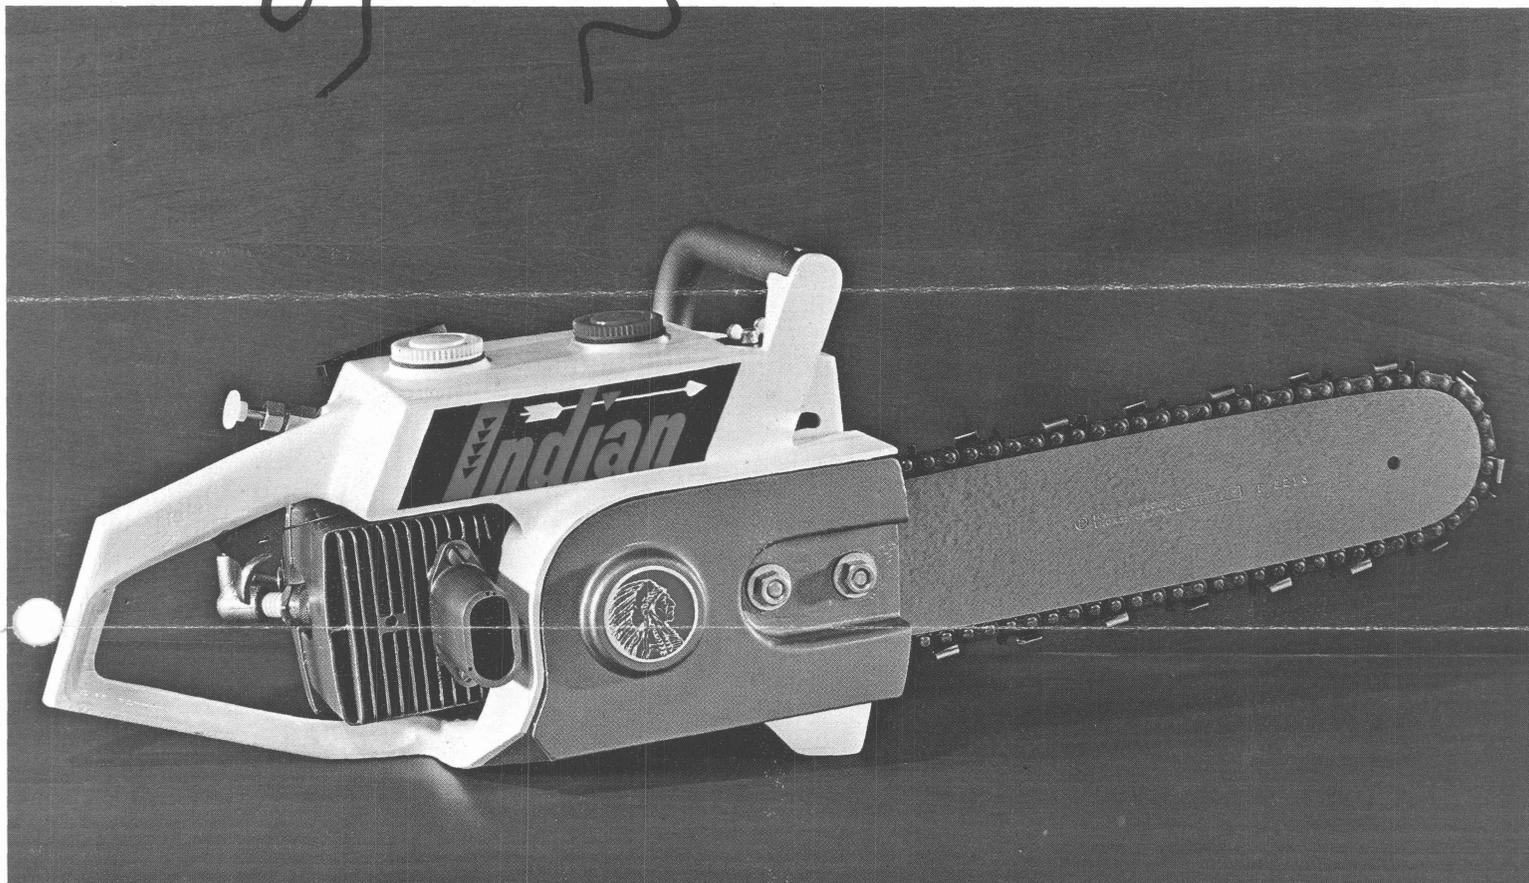

WORLD'S LIGHTEST 5 H.P.*

ZEPHYR WEIGHT

AUG. 1965

CHAIN SAW

Up to 60% More Power than saws weighing only a few ounces less

The newest INDIAN Super 5-12 develops a full five horsepower* (Industry Rating). This extra power means up to 60% faster cutting through hardest woods. The Super 5-12 was not designed for soap carving or model making. It's a man's saw to handle **man-size** cutting jobs. With this new ZEPHYR weight INDIAN, — cutting is a breeze — even with a 24" bar.

"UNIT-BILT" of Magnesium, tanks and frame are cast in one piece. Fewer parts mean easier service and repair. "UNIT-BILT" for less vibration — nothing to shake loose — no gaskets to leak. All-position carburetor — for fast cutting even upside down. Automatic clutch, hotter ignition, automatic recoil starter

assure easy starts even in coldest weather.

Lightest weight with perfectly balanced horizontal engine guarantee less user fatigue.

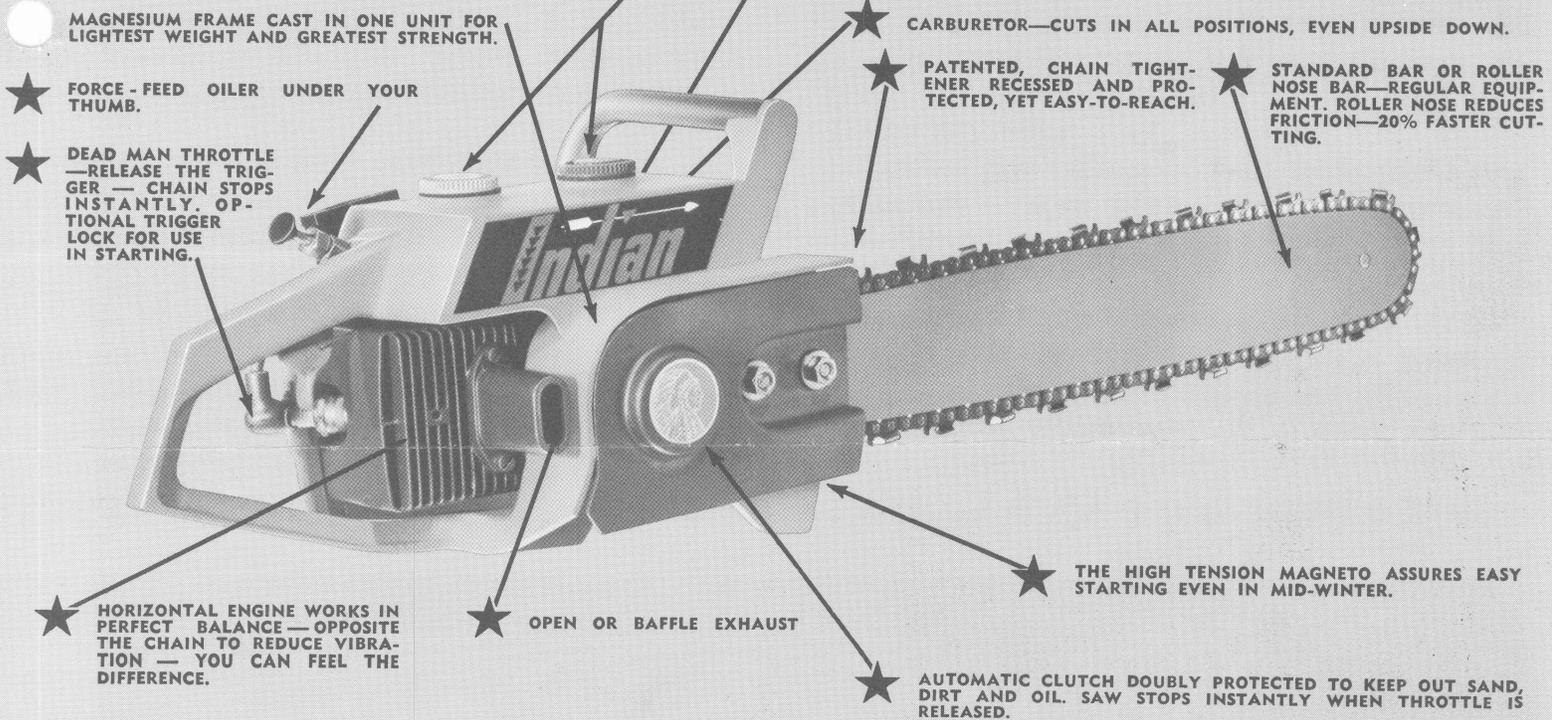

Quality **built in** for long, trouble-free performance — West Bend engines; Tillotson carburetors; Wico ignition; Dow magnesium cast frame and tanks.

Get the **facts** before you buy! Some of the new "world's lightest weight" chain saws are 3.0 cu. inch displacement. Others are 3.3, 4.0 or 4.2 cu. inch. The INDIAN Super 5-12 is a full 5.0 cu. inch. Compare weight to horsepower or displacement. www.IndianSaws.com - INDIAN wins!
