

HORNET TWO-WAY BOW SAW

Two bevelled cutting edges make notching and felling easy and natural, with no bind or pinch. Bucks timber up to 18" in diameter, fells much larger trees. Sturdy magnesium casting, gives light-weight portability and strength. Sold as a unit or as an attachment, complete with chain and transmission, ready to assemble to any 3500H or 3600H series, Model DJ Chain Saw Engine.

A special clamping ring (#3567H) must be used on all DJ units previous to series 3500H, if they are to be fitted with the complete Bow Saw Attachment.

MALL IE12 ELECTRIC HAND CHAIN SAW

The compact design of the IE12 gives versatile one-hand operation. Comes equipped with fast cutting Standard Shark Tooth, or Planer Tooth Chain.

The finest light-duty chain saw available anywhere. Small in size but BIG in value and performance. Cuts timber up to 12" in diameter, with one cut. Universal electric motor, powered for 115 volt A.C.-D.C. 25 or 60 cycle home current. Made of light-weight aluminum and magnesium alloy, for tough wear. Weighs only 11 lbs. Ideal for pruning trees, cutting lumber, cordwood, pulp and clearing and construction work. A time and money saver for parks commissions and public utilities. Equally efficient on house current or on the portable 1500 watt Mall generator.
