INTRODUCTION

This Publications Guide is designed for quick location of any McCulloch product and to easily identify the Illustrated Parts List, Operator's Manual and Shop Manual for which the literature has been published.

Chain saws in this Guide are listed by model name in numerical order on pages 1-4. Other units are listed by model name in alphabetical order on pages 4-9.

In the event that a model name or a model number is not known, it may be possible to locate the product by identifying its picture.

The model number and serial number of products manufactured since 1967 are stamped on the identification plate or the identification label attached to the product. Please note that current models have a suffix number (-01, -02, -03, etc.) after the model number. Earlier units have a suffix letter (A, B, C, etc.).

Please note that products listed in this Publications Guide show an illustration of the product followed by the model name and model numbers. Serial number prefixes are listed to the right of the model number.
