

OMARK CHAIN SAW, CIRCA 1964

Note: Developed by Lewis Scott. And yes, that is a soup can gas tank. Scotty decided to try a 3/8" - pitch chain and needed a saw it would fit. He and Ray Pomeroy made 10 saws, sent them out for testing and the results were that they were YEARS ahead of their time. (No one saw a use for small saws back then.)

Weight: 9 lbs.
