Partner 650

For those who do a lot of work in the forest and are dependent on a powerful and reliable chain saw, the Partner 650 is a good choice. Its reliability is well proven — the Partner 650 has been on the market for many years and new, improved components have successively been incorporated in its design.

It just starts and runs . . .

Working conditions have practically no effect on the Partner 650 — it starts unflinching and just keeps on running. One of the reasons for its reliability is the ignition system developed by Electrolux Motor.

It runs smoothly and unhesitatingly regardless of the ambient temperature . . . the petrol tank of plastic is separate from the engine.

It lasts longer

The Partner 650 is built for lengthy service. Many components might be thought over-dimensioned for a semi-professional chain saw. But they give the saw a longer useful life. Other components, like the handle arch, have been made lighter instead. And that gives the saw an outstanding power-to-weight ratio — 0.65 kg per hp.

It is safe

The Partner 650 has the same safety features as the Partner 7000 Plus professional chain saw, so the 650 is a saw you can depend on. Chain brake, chain catcher stud, right-hand guard — nothing is missing.

Easy to service

It is extremely easy to carry out routine service on the Partner 650. A single screw holds the cylinder cover in place. Back off this screw and the cylinder, carburettor and ignition system are readily accessible. To clean the filter in the air cleaner you only need to back off two screws. And replacement of the damping elements for the handles could scarcely be easier than on the Partner 650.

TECHNICAL DATA

Model	650
Cylinder capacity cc	65
Engine speed at max. power rpm (r/s)	8500 (140)
Fuel tank cap. litre	0.75 (1.6 US pint)
Oil tank cap. litre	0.35 (0.7 US pint)
Guide bar Standard	15"—24" (38—61 cm)
Chain pitch	3/8"
Weight, empty with guide bar and chain, kg	7.3 (16 lbs)
Weight, powerhead only, kg	6.2 (13.6 lbs)
