

SOLO "TWIN"

The first production line 2 Cylinder Chain Saw produced in the world. Weighing only 20lb, this machine is the ultimate in power, comfort and reliability. Because of its revolutionary design it is absolutely free of any vibration whatsoever. It can be started very easily—just one finger.

THE TWIN'S EASY, RELIABLE STARTING SYSTEM

STARTER IS CONVENIENTLY LOCATED

The TWIN's starter is located on the opposite side from the air cooling intake, which has the advantages of utilizing otherwise dead space and makes the starter unusually easy to get at, to change the starter rope or for immediate accessibility after removing the cover.

A NEW DEVELOPMENT IN RELIABLE MAGNETOS

The manufacturers of the world - famous Bosch magneto have worked with SOLO to develop a new type of super-reliable magneto for the TWIN. This magneto, with its magnets cast into the fan does away with a magneto fly-wheel, which gives extra space for its extra size and solid coils. Production of a most efficient and reliable spark results.

The magneto electrical connections fit into the terminals firmly since screws are not used, they are vibration proof and can easily be removed without tools.

GENEROUS AIR COOLING ASSURES ENGINE PERFORMANCE

The extra large sized air intake provides plenty of cool air for the twin-cylinder engine. The fan intake opening is effectively screened, and the fan is easily accessible by removal of the screen.

AUTOMATIC SERVO-ACTION GIVES CLUTCH LONG-TIME WEAR

The TWIN's centrifugal clutch functions with servo-action. Pressure of the shoes is increased automatically. This gives limited friction range and reduces shoe wear to a minimum.

THE SOLO SAW IS IDEAL FOR THE WOODS-MAN-AND SOLO SERVICE BACKS YOU UP.

This Saw is designed so that ordinary maintenance can be done by you - simply, at low cost, with little loss of time. A special tool kit comes with the saw to make normal in the woods repairs easy. However, this is backed by SOLO's extensive and expert Service Agencies - who are ready to make any necessary saw repairs or help you with any problems, speedily and effectively.
