

FIVE WHITE[®] CHAIN SAWS

10 TO 17 IN. BARS

WM
WHITE MOTOR
CORPORATION

CHAIN SAW ECONOMICS... WE'LL LIGHT YOUR FIRE

If you have a fireplace, you've more than likely done a "slow burn" after the firewood truck has pulled out of your driveway. It's what we call "the high cost of burning." Burning firewood... that is.

White can change all that for you. With the help of one of our

five high performance chain saws, you can reduce the cost of firewood. Cut your own in your own backyard. White chain saws... four gas and one electric... will cut cord after cord of firewood in addition to making short work of trimming trees and clearing overgrown back lots. And it won't cost you a thing except a Saturday afternoon.

Take your pick. Gas saws from 1.9 to 3.6 cu. in. displacement... plus a 2-hp electric saw. Cutting bars from 10 to 17 inches.

These saws are convenient. Large diameter pulleys make for fast, sure starts. (Use a plug-in for the electric.) Automatic chain oiling, featured on all gas-operated saws, keeps the chain cutting longer.

For added insurance, a manual oiler is provided on the WM 360, WM 21, WM 19 D, and WM 12 for tough going.

White's isolated fuel tank is away from the heat. The fuel finder guarantees gas delivery at any working angle. Even upside down.

Chain saw housings are made from tough, lightweight magnesium. There's no plastic in them that might wear or fatigue after years of hard use.

With safety in mind, White chain saws won't budge until you pull the trigger that tells them to. At idle, an automatic centrifugal clutch keeps the chain static. Both hands stay in the correct working position during operation, thanks to conveniently placed controls.

So... how much do they cost? You'll be surprised how little. You see, the price is part of our "anti-high cost of burning" philosophy. The cost of cutting is low no matter what you're cutting.

See a White dealer for the lightweight chain saws with the heavyweight features.

And take time to saw some logs of your own... in the hammock!

WM 360
Heavy duty.
3.6 cu. in.
34-in. cut.

WM 210 Fast cut.
(8 inches in 4 seconds.)
2.1 cu. in. displacement.
8.5 lbs. 28-inch cut.

WM 19 D Deluxe
lightweight 1.9 cu. in.
displacement. 24-inch cut.

WM 19 Real lightweight. (Under 8 lbs.)
1.9 cu. in. displacement.
20-inch cut.

WM 12 2 hp, 12 amp
electric. Double insulated.
Superfast cutting.

White's baffled muffler means the saw works quietly, meeting all state and local codes, so it won't annoy you or your neighbors.

One more reason why White guarantees its saws will work right...chrome-plated cylinder walls and pistons that last longer. White's unique air filtering system (filter opposite the side of the muffler) filters all incoming air. The result is longer engine life.

A White chain saw is more than lightweight. It's also balanced right in the center. Its well balanced design makes work easy, whether it's cutting heavy timber or light tree trimming and pruning.

Stoodite alloy tipped guide bars mean long life. They're reversible for even more life. Most White chains have chrome-plated cutter teeth that hold up over long periods of hard use.

White's dynamically balanced crankshaft reduces the vibration in the engine. White engines are 100 per cent ball and needle bearing equipped. There are no sleeves or bushings to lose tolerance and performance. Just two more reasons why White saws will work with you right from the very start. And why you get our guarantee of that for one full year.

White's electric chain saw works safely. It's shockproof and it's double insulated. But this 14-inch electric is more than just safe. It's also one of the most powerful electric saws on the market.

YOUR WHITE DEALER PROVIDES SERVICE YEAR-ROUND.

With White, you get more than just a high performance chain saw.

You get a company and a dealer who stand behind all they sell.

That means service if and when you ever need it...right from the man you bought it from.

You'll also know where to find a full line of accessories and maintenance items for your White chain saw.

Whether it's one of our four gas-powered chain saws or the quiet White electric.

Each is built to earn the White name...providing you with outstanding design features that make these saws the performance leaders.
