

MC40

by McCULLOCH

Custom Job?

No! This isn't somebody's modified McCulloch. It's an honest to goodness "out-of-the-box" McCulloch that promises to set the pace in its class. We've saved you all the time usually spent hopping-up your kart engine. **It's all been done:** polished crankshaft, gullied exhaust port, pinned rings, dual carbs and velocity stacks, a special design V-6 reed block and manifold, displacement of 6.05 cubic inches in a reborable cast iron liner . . . plus a host of other racing modifications! **What's left to do?** Mount it on your kart . . . and **GO!**
