

**NEW McCULLOCH  
2 CYCLE OIL  
GIVES LONGER  
ENGINE LIFE  
WITH BETTER  
PERFORMANCE**

A major breakthrough in the field of 2 cycle engine lubrication means that you can now buy an oil that will actually **clean your engine** as it runs and give up to **50% more spark plug life**.

This new McCulloch oil, manufactured from 100% paraffin base crude, uses a non-ash detergent exclusively developed for 2 cycle engines. This special detergent overcomes the problems found in conventionally compounded, ash-forming heavy duty oils, eliminating ring sticking, piston and cylinder scoring, spark plug fouling and power loss due to port plugging.

Exhaustive laboratory tests, conducted on every type of 2 cycle engine, prove that McCulloch oil gives superior performance under all types of operating conditions, including tests in which engines were run for long periods under high load conditions. The new oil sticks to hot bearings and continues to lubricate at high engine temperatures where conventional oils break down and cause piston scuffing and seizure.

McCulloch oil also provides excellent rust protection in engines stored under wet conditions or used in areas conducive to rust formation. From every standpoint this new oil means money in your pocket in longer engine life and increased production.

McCulloch oil is available in these handy sizes:

12 oz. can  
1 qt. can

Case of 24 - 12 oz. cans  
Case of 48 - 12 oz. cans

6-Pack of 12 oz. cans

**McCULLOCH GEAR OIL** is compounded to do the best lubrication job in McCulloch Chain Saw transmissions. Cutting conditions that range from light to heavy or hot to cold demand exacting transmission performance. Special additives have been blended into the oil to prevent gum deposits, corrosion and insure full-time grease flow. Packaged in an easy-to-pour, screw-top can.

**McCULLOCH SAFETY HELMETS** have been designed for maximum head protection and top wearing comfort. The helmet body is molded of heat-hardened aluminum, reinforced by a rib design for added strength. A fully suspended headband cushions shock. McCulloch helmets are ideal for any use where safety is a factor. McCulloch helmets meet all U.S. Government safety requirements. **McCulloch replaceable headbands are available.** Easily attaches to McCulloch helmet brim.

**McCULLOCH GAS CAN.** A safe 2½ gal. fuel storage can with duo-pour rigid spout and positive acting vent control. Galvanized to prevent corrosion, it meets all requirements as a fuel container for chain saws, outboards, lawnmowers and power garden tools. Comes equipped with strainer, strainer collar and an oil measure graduated in ¼, ⅓ and ½ pint capacities plus printed fuel mixing instructions. Detachable flexible pouring spout clips securely to can when not in use.

**ZERO HOOD** is designed exclusively for use in the McCulloch Safety Helmet. Tough, lightweight yellow gabertex shell, lined with brushed cotton, affords cold weather and windbreaking protection for the head, ears and neck. It is washable, and can be worn under the McCulloch Safety Helmet.

**McCULLOCH CHAIN-SAW ENAMEL** in a handy easy to use 12 oz. self-spraying can will help you keep your chain saw looking like new. This specially compounded spray paint is quickly mixed, easy to apply, rapid drying and has penetrating characteristics for lasting quality. These pressurized containers make repainting and retouching so easy that anyone can use it for a professional job.
