

# McCULLOCH

## BRUSHCUTTERS and WEEDCUTTER

**WORK SAFELY ON ANY TERRAIN . . .  
FAST - EFFICIENTLY - ECONOMICALLY!**

Make short work of big brush-clearing jobs with McCulloch's dependable **MAC 35A Brushcutter**. Whip through thick brush and saplings — even prune tree branches up to 6 inches in diameter! Special McCulloch harness permits "light touch" control of brushcutter, yet provides maximum operator safety.

Also available is McCulloch's heavy-duty **Model 200 Brushcutter** or **Weedcutter**. As a brushcutter the **200** handles the really rugged cutting chores with ease. Plows through the toughest underbrush with power to spare . . . weighs just 33 pounds!

The **Model 200** is also available as a **Weedcutter**. Its special cutter head gets into hard to reach areas around buildings, culverts, fences, etc., and flush-cuts weeds and grass quick as a wink.

**OPERATOR SAFETY.** New McCulloch harness prevents accidental contact with cutter blade; gives operator maximum protection. Harness supports weight, leaves operator's hands free to guide unit.

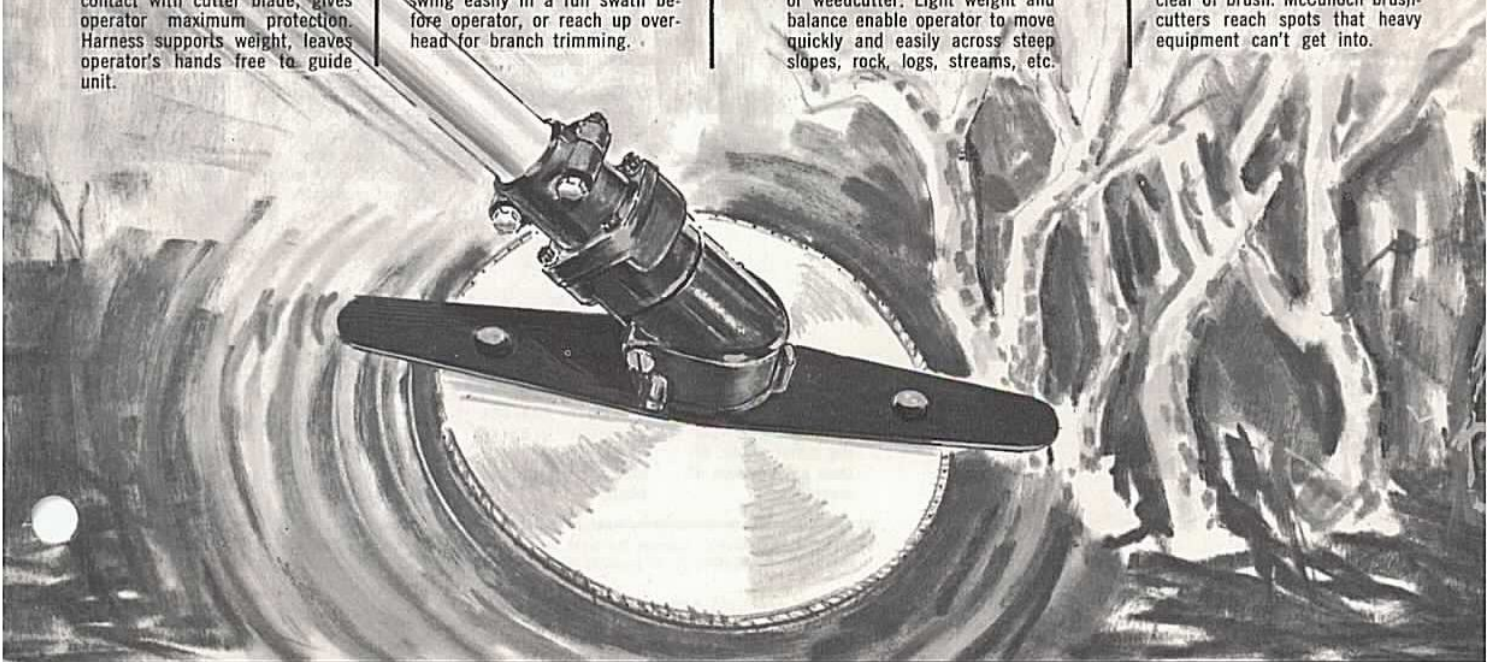

**LIGHT-TOUCH BALANCE.** Balanced design allows cutter head to swing easily in a full swath before operator, or reach up overhead for branch trimming.

**ROUGH TERRAIN** poses no problem for McCulloch brushcutters or weedcutter. Light weight and balance enable operator to move quickly and easily across steep slopes, rock, logs, streams, etc.

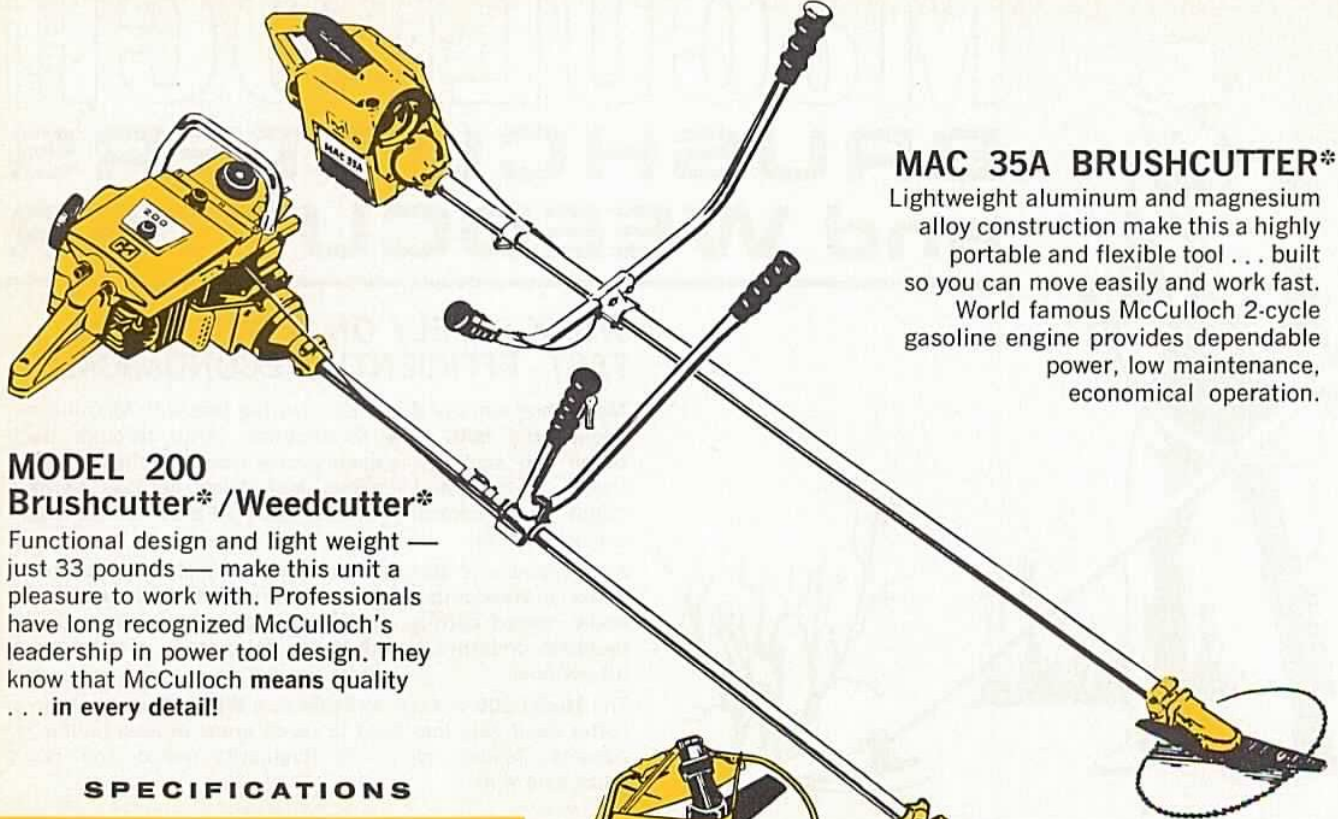

**FARMERS and FORESTERS** recognize the need to keep fire breaks clear of brush. McCulloch brushcutters reach spots that heavy equipment can't get into.

Length with engine, cutter head . . . . .	6' 10"	Same
Length less engine, with cutter head . . . . .	6' 2"	6'
Handle Bar Width . . . . .	2' 5½"	Same
Weight with engine, less cutting head . . . . .	27½ lbs.	30½ lbs.
Weight of attachment, less cutting head and engine . . . . .	10½ lbs.	Same
<b>Brushcutter Head</b>		
Blade . . . . .	80 tooth, 10" dia. High carbon steel	Same
Blade . . . . .	44 tooth, 10" dia. High carbon steel	Same
Blade Guard . . . . .	High carbon steel	Same
Weight — head, blade and guard . . . . .	5½ lbs.	Same
<b>Weedcutter Head</b>		
Blade . . . . .	14" High carbon steel, edge flame hardened	Not Available
Blade Guard . . . . .	Stamped Steel	
Weight — head, blade and guard . . . . .	8 lbs.	
<b>Shaft-Engine End Clutch Drum Assembly</b>		
Bearings . . . . .	Ball	Same
Governor . . . . .	1 — Shoe Centrifugal — Electrical	Same
Housing — Bearing . . . . .	Cast Aluminum	Same
Shaft Assembly — Drive . . . . .	Tube-Steel	Same
<b>Housing Assembly Drive Shaft</b>		
Bushing — Drive Shaft . . . . .	3 — Anti-Friction	Same
Bearing . . . . .	Ball	Same
Housing — Gear . . . . .	Cast Aluminum	Same
Bearings . . . . .	Ball	Same
Gear — Bevel . . . . .	Zero Type	Same
Bevel Gear Drive . . . . .	1.7:1 Reduction	2.5:1

Weedcutter is available for Model 200 only

"LEADERSHIP THROUGH

CREATIVE ENGINEERING"

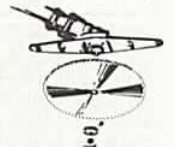

Squeeze-grip throttle on handlebar controls engine speed. Upon release by operator, engine idles, cutter blade stops.

Fully automatic clutch drives cutter head as engine speed is increased, disengages as speed is decreased. Automatic safety!

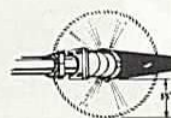

Sturdy, lightweight drive shaft transmits power between engine and gearbox. Internal bushings prevent shaft-whip.

Friction washers absorb impact loads and shock, assure low maintenance costs, long gear and bearing life.

Safety harness prevents operator from accidentally contacting cutter blade. Allows full freedom of movement.

Compact gearbox permits greater depth of cut with smaller diameter blade.

The blade guard prevents kick-back, provides leverage for cutting heavy brush and saplings.

Weedcutter head has protective ring guard which removes quickly for use away from fences, buildings, etc.

\*Brushcutters or Weedcutter are available as attachments (without engine) for use with several other McCulloch engines. For details see your local McCulloch dealer.
