

# Publications Guide

## **illustrated parts lists owner's manuals shop manuals production dates**

This Publications Guide will allow you to easily identify the illustrated parts list, owner's manual, and shop manual which is currently applicable to any chain saw, attachment, kart engine, or generator for which the literature has been published.

Table 1 is designed so that a product may be found by model name. The MODEL NAME column is arranged by the size of the number contained within the model name (lowest to highest). When the model name is not known but the model number is known, Table 2 may be used to identify the model name.

After identifying the model name in Table 2, use Table 1 to locate the product by model name. If neither the model name nor model number is known, it may be possible to identify the product by identifying its picture in Table 1.

The model number and serial number of products manufactured since 1967 are stamped on the identification plate attached to the product. Please note that current models have a suffix letter (A, B, C, etc.) after the model number. Also note that the listed publications pertain only to models which have one of the serial number prefixes listed to the right of the model name and number.

TABLE 1
