McCULLOCH®

TITAN 57™

Among the most technologically advanced chain saws manufactured today, the McCulloch TITAN 57/50 series incorporates elements that were ideas only a few years ago.

The TITAN 57 and TITAN 50 were built to deliver maximum power and performance when needed most. The vertical cylinder engines feature automatic gear driven chain oilers as well as an independent manual oiling system which provides additional lubrication during heavy use. Both chain saws feature an anti-vibration system to reduce user fatigue and provide more comfortable handling.

The TITAN 57 and TITAN 50 are quality built, precision engineered chain saws that were designed to deliver professional performance for all chain saw users.

SPECIFICATIONS

Model	Displacement	Bar Length	Weight
TITAN 57	57cc/3.5 C.I.	16" -24"	12.6 lbs. (PUO)
TITAN 50	51cc/3.1 C.I.	16" -20"	12.4 lbs. (PUO)

McCULLOCH®

TITAN 50

TITAN 57/TITAN 50 FEATURES

- ① **Anti-Vibration System** reduces user fatigue, and provides more comfortable handling by isolating the handle from the powerhead
- ② **Chain Brake/Hand Guard** reduces the possibility of injury from kickback by stopping the chain in milliseconds
- ③ **All Position Diaphragm Carburetor** functions in any cutting position
- ④ **Manual Chain Oiler** works as a primer for the automatic oiler and provides additional oil during heavy use
- ⑤ **Automatic Adjustable Gear-Driven Chain Oiler** provides proper lubrication in all cutting situations
- ⑥ **Professional Hard-Chrome Cylinder Bore** for longer life, efficient cooling, and less friction
- ⑦ **Electronic Ignition** for easier starting and reduced maintenance

McCULLOCH®

TITAN 40™

The McCulloch TITAN 40 and the TITAN 35 were designed for all applications that require a small but powerful chain saw.

Manufactured to exacting standards, the vertical cylinder TITAN 40 and TITAN 35 were designed for easy serviceability and feature an automatic

gear driven oiler providing proper lubrication for all cutting situations. The large muffler delivers better cooling and lowers noise. Both chain saws also feature an advanced anti-vibration system which reduces user fatigue; an electronic ignition that makes starting a snap and ensures maximum performance at peak power.

When the job calls for a small easy handling chain saw with professional performance —the answer is a TITAN 40 or TITAN 35.

SPECIFICATIONS

Model	Displacement	Bar Length	Weight
TITAN 40	38cc/2.3 C.I.	14" - 18"	11.1 lbs. (PUO)
TITAN 35	35cc/2.1 C.I.	14" - 16"	11.0 lbs. (PUO)

McCULLOCH®

TITAN 35™

TITAN 40/TITAN 35 FEATURES

- ① **Chain Brake/Hand Guard** reduces the possibility of injury from kickback by stopping the chain in milliseconds
- ② **Anti-Vibration System** reduces user fatigue, and provides more comfortable handling by isolating the handle from the power head
- ③ **Professional, Hard-Chrome Cylinder Bore** for longer life, efficient cooling, and less friction
- ④ **All Position Diaphragm Carburetor** functions in any cutting position
- ⑤ **Automatic Gear-Driven Chain Oiler** provides proper lubrication in all cutting situations
- ⑥ **Electronic Ignition** makes starting easier and reduces maintenance

SPECIFICATIONS

	TITAN 57	TITAN 50	TITAN 40	TITAN 35
Displacement C.I.D. (cc)	3.5 (57)	3.1 (51)	2.3 (38)	2.1 (35)
Bore and Stroke	1.850 x 1.299	1.772 x 1.259	1.575 x 1.181	1.496 x 1.181

TITAN™

*Tomorrow's Technology
Today*

The future is approaching at an almost incomprehensible rate. With the future comes advances in technology, requiring us to erase our perception of what is, and ask ourselves "What could be?"

Our answers led us to breakthroughs that helped us create the most advanced outdoor power equipment ever designed — McCulloch TITAN—with features far beyond those found in any other chain saw.

Join the future now with TITAN 57/50 and TITAN 40/35.
